50X1-HUM

The Estonslanets Combine distributes its production of raw shale in the following proportion: 75% is delivered to the Kohtla-Jarve Combine for processing into oils and gas; 15% is supplied as fuel to electrical power stations in the Estonian SSR; and 10%, according to official data, is sent to Leningrad as fuel for factories there.

50X1-HUM

Comment:

it is apparent that Estonslanets includes most or all plants and mines in Estonia connected with shale, and the

main office of the combine is in Tallinn.
